**4-in-1 Remote Control
featuring Memory Lock™**

www.uselectronics.com

**featuring
MEMORY LOCK™**

before you begin

If you have a TV with a remote control, we recommend that you plug its power cord directly into a wall outlet if available (your cable installer may select an alternate setup).

Make sure to set your TV to channel 2, 3, or 4 as directed by your cable company.

I N F O **Memory Lock™** is an exclusive technology that saves the device codes that are programmed into the remote, even when the batteries are removed.

installing batteries

Before you can program or operate the remote control, you must install two AAA Alkaline batteries.

Step 1

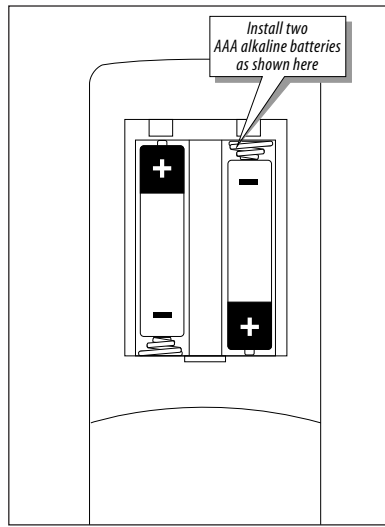

Remove the battery compartment cover on the back of your remote control.

Step 2:

Check battery polarity carefully, and install the batteries as shown in the illustration below.

Step 3:

Replace the battery compartment cover.

button functions

cable box function keys

See the chart below for a description of the key functions.

device/number keys

- Device keys select what device the buttons on the remote will operate.
- Number keys allow you to enter the channel you want to view. You will also use them to setup the remote.

vcr controls

These keys operate standard VCR functions. **Operating Note:** Press the [RECORD] button (or the [EPG RECORD] button) twice to start recording on your VCR.

The chart below shows the functions of special keys for your cable box and program guide. See the cable box manual for further details.

* (HELP)	displays help for the on-screen display	NOTE Depending on the configuration of your cable box, certain functions listed here may or may not be functional.
# (FAV)	cycles through your favorite channels	
A/THEME	future use	
LAST	recalls the last channel that was viewed	
MUSIC/ENTER	switches between cable TV and Music Choice™	
MUTE	turns volume off	
B/LIST	future use	
EXIT	exits the on-screen display menus	
PPV	displays pay-per-view options	
SWITCH	switches between cable inputs on a dual-cable system	
C/CANCEL	future use	
INFO	displays channel and program information	
MENU	displays the main on-screen display menu	
GUIDE	displays the program guide	
SEL	selects various options and tunes programs from the program guide	
CURSOR KEYS	navigate through on-screen guides (see the highlighted section above)	
PAGE +/-	pages through on-screen menu and program guide screens	
DAY +/-	moves the program guide one day forward and backward	

US Electronics provides these function descriptions as a general guide to allow you to become more familiar with your cable box. Refer to your cable box manual for descriptions of specific functions.

setting up your remote control

Before you get started, find the red buttons labelled [VCR], [TV], and [CABLE] at the top of the remote control. In this section we'll refer to each of these buttons as a [DEVICE] buttons. Each time you see [DEVICE] button in the in this section, press the appropriate button for the device that will be operated by the remote (TV, VCR, Cable Box, etc.). Next, find the [SETUP] button at the bottom of the remote control. Once you are familiar with the location of the buttons, continue below.

1. for your VCR, TV, and cable box

Press the [DEVICE] button, then the [SETUP] button on the remote.

Enter the 3-digit device code for your brand of device listed in the charts on the other side of this manual by pressing the appropriate buttons on the numeric key pad.

Press the [SETUP] button again to save the code. The red indicator light at the upper right-hand corner of your remote will flash 3 times if these steps were followed correctly.

Press the [POWER] button to test the code you've entered. The device should turn ON or OFF each time the [POWER] button is pressed. If the device doesn't turn ON and OFF, repeat this setup procedure with the next code listed for the device.

2. for a digital music terminal (optional)

Press the [AUX] button, then the [SETUP] button on the remote.

Enter the 3-digit device code for your type of digital music terminal by pressing the appropriate buttons on the numeric key pad.

Jerrold DCR1000000
Scientific-Atlanta DMX002

Press the [SETUP] button again to save the code. The red indicator light at the upper right-hand corner of your remote will flash 3 times if these steps were followed correctly.

Press the [AUX] button again to test the code you've entered. The device should turn ON or OFF each time the [POWER] button is pressed. If the device doesn't turn ON and OFF, repeat this setup procedure with the next code listed for the device.

3. for an auxilliary device (optional)

The red [AUX] button allows you to control a or a second TV or VCR if you aren't using it for a digital music terminal. To do this, you need to setup the [AUX] button so it functions like a second [TV] or [VCR] button.

Press the [SETUP] button, then the [MENU] button on the remote.

Now, press the [AUX] button, and then the button that you want the [AUX] button to emulate (either the [TV] or [VCR] button), then press the [SETUP] button. The red indicator light at the upper right-hand corner of your remote will flash 3 times if these steps were followed correctly.

The [AUX] button can now be programmed to control the specific device. Follow the instructions above in step 1 and press the [AUX] button any time you are told to press the [DEVICE] button.

Helpful Hint	The setup code for Jerrold /GI/Motorola DCT digital converters and CFT2200™ series cable boxes is 002
---------------------	--

cable box code

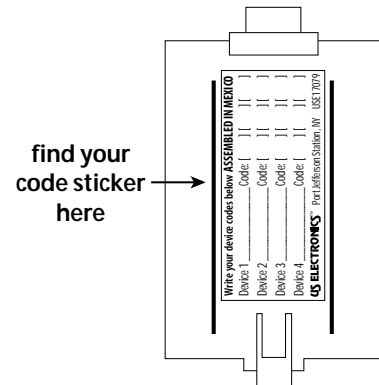

The setup code for the GI/Jerrold™ DCT1000 and CFT2200™ series cable boxes is:

002

Jerrold™ is a trademark of GIC corp.

helpful hint

Once you have found your TV, VCR, and Cable Box codes, write them down for safe keeping on the code sticker that's *inside* the battery cover (see illustration below). Attach the "Quick Programming Instructions" sticker to the outside of the battery cover.

notes

television codes

If your TV is made by one of the manufacturers listed to the right, try that code first. Otherwise, find your code in the chart below.

troubleshooting guide

? Problem

I programmed the remote, but it won't work my TV, VCR, or Cable Box.

😊 Solution

You may have entered the wrong code (or the correct code might not be listed). Try entering all of the device manufacturer's codes again, starting with the manufacturer's popular code if one is available.

If you are still unable to operate your device, follow the instructions in the section titled **CodeScan™**.

Weak batteries may cause the remote to only operate one device. If this happens, simply replace them with **NEW** alkaline batteries and reprogram the remote. If you are sure the batteries are good, try rolling them with your finger to ensure a good connection.

? Problem

My remote control doesn't operate my combination TV/VCR.

😊 Solution

Most combination TV/VCRs have VCR tuners in them. You will need to select a code from the VCR section that will power up your TV/VCR. If this is the case, you probably won't need to use a TV code. Also, to control volume with your remote control, you must program the remote for the cable box last.

CodeScan™

If none of the codes listed for your Cable Box, TV, or VCR works, the CodeScan™ method will allow you to cycle through all the available codes in the remote until you find the right Cable Box, TV, or VCR code.

step 1

Manually turn ON power to the device you want to program the remote for (Cable Box, TV, or VCR).

step 2

the right arrow key

Point the remote control at the device, and press the following keys:

[the device button](the red buttons at the top of the remote), **[SETUP]**, **[the right arrow key]**, then the **[POWER]** button.

If the device is still ON, continue at step 3 below. If it turns OFF, press **[SETUP]** again to store the code you just selected, and you're all done. The red indicator light at the upper right-hand corner of your remote will flash 3 times if these steps were followed correctly.

step 3

Press **[the right arrow key]**, then the **[POWER]** button until the device turns OFF. When the device turns OFF, press **[SETUP]** to save the code.

Please be patient — there are about 90 possible codes.
